RAPTHORS AUTOMOTIVES BATTERY (CAR)

An automotive battery, or car battery, is a rechargeable battery that is used to start a motor vehicle. Its main purpose is to provide an electric current to the electric-powered starting motor, which in turn starts the chemically-powered internal combustion engine that actually propels the vehicle.

RAPHORS AUTOMOTIVES BATTERY (MOTORCYCLE)

The lead acid motorcycle battery is the most common battery type and was the first rechargeable battery ever created. Lead acid batteries are affordable but lack durability. They are unsuited for cold temperatures since the acid has a low freezing point.
